### Essays on Geography and GIS

## Besplatne e-knjige

182

The ESRI publication *ArcNews* is the greatest edition among GIS publications. It is published four times a year in 750 000 copies, and there is also *ArcNews Online*. Its content relates to ESRI's activities and products. However, *ArcNews* has in recent years contained articles on trends in geography, geospatial themes and GIS written by university professors and scientists. Some of the articles were published as an e-book titled *Essays on Geography and GIS* in 2008. A second volume of the book was published in 2009 and a third in March of 2011, containing eight articles:

- M. Laituri: Geospatial Responses to Disasters: The Role of Cyberspace
- W. Craig: Governance of the NSDI
- M. Artz, J. Baumann: What is the Geographic Approach
- K. Field: Kingston University London: 20 Years of GIS Education
- M. Craglia: Building INSPIRE: The Spatial Data Infrastructure for Europe
- J. Dangermond: GIS in a Changing World
- K. Clarke: Getting to Know the Mapping Sciences Committee
- J. Dangermond: Opening the World to Everyone.

The entire publication as well as many others are available free of charge in pdf at the ESRI web site <http://www.esri.com/showcase/best-practices/index.html>.

ESRI-jeva publikacija *ArcNews* je publikacija s najvećom nakladom na području GIS-a. Izlazi u nakladi od 750 000

četiri puta godišnje, a postoji i *ArcNews Online*. Sadržaj je vezan za ESRI-jevu djelatnost i njihove proizvode. Međutim, posljednjih godina *ArcNews* sadrži i seriju članaka o trendovima u geografiji, geoprostornim temama i GIS-u koje pišu sveučilišni nastavnici i znanstvenici. Određeni broj tih članaka sakupljen je i u obliku e-knjige objavljen 2008. pod naslovom *Essays on geography and GIS*. Drugivezak iz te serije objavljen je 2009, a u veljači 2011. i trećivezak koji sadrži osam članaka:

- M. Laituri: Geospatial Responses to Disasters: The Role of Cyberspace
- W. Craig: Governance of the NSDI
- M. Artz, J. Baumann: What is the Geographic Approach
- K. Field: Kingston University London: 20 Years of GIS Education
- M. Craglia: Building INSPIRE: The Spatial Data Infrastructure for Europe
- J. Dangermond: GIS in a Changing World
- K. Clarke: Getting to Know the Mapping Sciences Committee
- J. Dangermond: Opening the World to Everyone.

Cjeloviti sadržaj navedene publikacije, ali i mnogih drugih, besplatno je u formatu pdf dostupan na web-stranicama ESRI-ja: <http://www.esri.com/showcase/best-practices/index.html>.
