

Applied Geography

Applied Geography is a journal dedicated to publishing research using geographic approach, including the geoinformation science, to solve human problems which have a spatial dimension.

The Elsevier global company has been publishing the journal four times a year since 1981. Members of the Croatian academic and research community have access to full texts of all papers published since 2006 via

the PERO browser (<http://lib.irb.hr/utility/pero>).

The journal is included in reputable bibliographic and citation databases: Current Contents – Social & Behavioural Sciences and Social Sciences Citation Index. Its impact factor for 2010 was 1.904, and its five-year impact factor is 2.320. According to its impact factor, Applied Geography is the 10th among 67 journals in the Geography group.

Cartographers can also publish results of their research in Applied Geography. Here are several titles related to cartography published from 2011 to April of 2012:

- W. M. Bass, R. D. Blanchard: Examining geographic visualization

as a technique for individual risk assessment, 2011, 1.

- J. Skaloš, M. Weber, Z. Lipský, I. Trpáková, M. Šantručková, L. Uhlířová, P. Kukla: Using old military survey maps and orthophotograph maps to analyse long-term land cover changes e Case study (Czech Republic), 2011, 2.
- K. T. Morrison, T. A. Nelson, A. S. Ostry: Mapping spatial variation in food consumption, 2011, 4.
- X. Yang, G-M. Jiang, X. Luo, Z. Zheng: Preliminary mapping of high-resolution rural population distribution based on imagery from Google Earth: A case study in the Lake Tai basin, eastern China, 2012, 2.

Applied Geography

Applied Geography je časopis posvećen objavljivanju rezultata istraživanja koja se koriste geografskim pristupom, među ostalim i geoinformacijskom znanosti, za rješavanje ljudskih problema koji imaju prostornu dimenziju.

Časopis izlazi od 1981. godine, izdavač je globalna kompanija Elsevier, a izlazi četiri puta godišnje. Članovima hrvatske akademske i istraživačke zajednice cjeloviti tekstovi svih čla-

naka od 2006. dostupni su preko pretraživača PERO (<http://lib.irb.hr/utility/pero>).

Časopis je uvršten u ugledne bibliografske i citatne baze: Current Contents – Social & Behavioral Sciences i Social Sciences Citation Index. Faktor odjeka za 2010. iznosi 1,904, a petogodišnji faktor odjeka je 2,320. U skupini Geography, među 67 časopisa, Applied Geography prema faktoru odjeka zauzima 10. mjesto.

U časopisu Applied Geography i kartografi mogu objavljivati rezultate svojih istraživanja. Navodimo nekoliko naslova s kartografskom tematikom objavljenih 2011. i do travnja 2012.:

- W. M. Bass, R. D. Blanchard: Examining geographic visualization

as a technique for individual risk assessment, 2011, 1.

- J. Skaloš, M. Weber, Z. Lipský, I. Trpáková, M. Šantručková, L. Uhlířová, P. Kukla: Using old military survey maps and orthophotograph maps to analyse long-term land cover changes e Case study (Czech Republic), 2011, 2.
- K. T. Morrison, T. A. Nelson, A. S. Ostry: Mapping spatial variation in food consumption, 2011, 4.
- X. Yang, G-M. Jiang, X. Luo, Z. Zheng: Preliminary mapping of high-resolution rural population distribution based on imagery from Google Earth: A case study in the Lake Tai basin, eastern China, 2012, 2.
